Is the evaluated use attainable? ☒ Yes ☐ No
Comments: The UAA was conducted in June 2005 and no WBCR was observed. The stream did not meet the maximum and average depth criteria at any of the 3 sites evaluated. The area surveyed was on the upper portion of the classified segment. Based on this survey and one conducted by Tetra Tech (UAA#0519), the committee recommends removing WBCR upstream of the confluence with Kyle Creek and retaining WBCR from the confluence with Kyle Creek (north of site 3188-002) downstream to the Class P segment.

Committee Recommendation: ☐ Retain Use ☒ Modify Use ☐ Remove Use ☐ Inconclusive
